Are you facing classes in math and science this semester? Will you have to interpret data from graphs and charts in your job? Would you like to be a better gambler? Or sharpen your money skills? No longer will you need to tell yourself that you are not good with figures once you've Read Winston J. Duncan's book *A Mind for Numbers*; *How to Exercise Your Brain To Think Like a Scientist*. Many of us struggled our way through math and science classes in school and were relieved once the semester was over. Duncan recognizes this and begins his book with what scientific thinking actually is: thinking strategically, or methodically. *A Mind for Numbers* states a true but little known fact: that scientific thinkers' minds actually grow stronger over their lifespans, as the mind of a non-scientific thinker grows weaker during the same time span. This is because scientists and their peers are constantly focused on solving problems and developing and honing theories to explain phenomena: they are constantly exercising their brains! Duncan's exercise's will improve our brains speed, accuracy, focus and clarity, regardless of our ages or previous mental activity level. If you feel like you're suffering from a foggy mindset lately, this could be the cure! *A Mind for Numbers* asks us to recall the processes we were to apply in school to mathematical and scientific questions. It's this process-oriented thinking that enables scientists and mathematicians to organize their thoughts. Duncan then outlines a detailed but easily adaptable plan for process-based thinking that readers can apply to any problem in their own lives, highlighting the purpose of...
