Excerpt from The Thorndike College Entrance Tests in the University of California A partial report of the gross results of this test was submitted by Dr. Burks. Its chief general points were: (1) the quality of entering students in the University of California is as high as that of other institutions; (2) the test is useless for those who can not use the English language readily; (3) the women made grades slightly lower than those attained by the men; (This difference, however, was not marked). (4) a distribution table of the grades by classes. The present examination was considered as a preliminary experiment to see whether or not examinations of this kind are practical in the University of California. A test or examination of this kind may be of the greatest value if it makes possible a fairly reliable prediction of the student's success or failure in college work, for if the test is reliable, certain students might be eliminated before a whole term's cost and teaching energy is wasted on them, or special efforts might be made to help them solve their difficulties. Plan Of Present Study The final grades in their college courses of those who took the Thorndike tests became available in June, 1921, for the calculation of correlations with the test scores. At the suggestion of Dean H. R. Hatfield, the sub-committee (Brown, Tolman, and Breitwieser) undertook a further study of these more complete data, with a view to getting information on the following points: 1. The general distribution curve of the freshman test scores and the place of failing freshmen in that distribution. 2. A general correlation of freshman test scores...
