

## Cyberspace Operations Concept Capability Plan 2016-2028 (Paperback)

By Army Training and Doctrine Command, The United States Army

Createspace Independent Publishing Platform, United States, 2016. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.TRADOC Pam 525-7-8 takes a comprehensive look at how the Army's future force in 2016-2028 will leverage cyberspace and CyberOps. This pamphlet includes a conceptual framework for integrating CyberOps into full spectrum operations (FSO), thereby providing the basis for follow-on doctrine development efforts. This conceptual framework outlines how commanders integrate CyberOps to gain advantage, protect that advantage, and place adversaries at a disadvantage. This pamphlet establishes a common lexicon for Army CyberOps, and describes the relationship between cyberspace, the other four domains (air, land, maritime, and space), and the electromagnetic spectrum (EMS). TRADOC Pam 525-7-8 explains how converging technologies will increasingly affect FSO and influence capability development; thereby enabling the Army to influence the design, development, acquisition, and employment of fully integrated cyber capabilities.
